

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application. Please cancel claims 1-20 and 31-58 and add new claims 59-63.

Detailed and Complete Listing of the Claims:

Claims 1-20 and 31-58. (Cancelled).

21. (Currently Amended) A child seat comprising:
a seat portion including a base having a seating surface; and
an object holder;
wherein the object holder is attached to the base; ~~and movable to a position at least partially under the seating surface~~
wherein the object holder includes a receptacle for receiving objects;
wherein the object holder is movable to a storage position; and
wherein the receptacle is partially under the seating surface in the storage position.
22. (Original) The child seat of claim 21, wherein the object holder is pivotally attached to the base.
23. (Original) The child seat of claim 21, wherein the object holder includes an extension slidably connected to the base and positioned under the seating surface.
24. (Currently Amended) The child seat of claim 23, wherein the extension includes a slot, and the base includes a post positioned in the slot to limit a the sliding motion of the object holder.
25. (Currently Amended) The child seat of claim 21, ~~wherein the car seat includes~~
further comprising a second object holder attached to the base.

26. (Original) The child seat of claim 21, wherein the object holder is configured so that when the object holder is moved under the seating surface a portion of the object holder remains accessible, thereby providing a gripping surface.

27. (Currently Amended) A child seat comprising: having
a seating surface on a base; and
an object holder ~~movably attached to the base and adapted to be at least~~
~~partially retracted under the seating surface;~~
wherein the object holder is attached to an extension slidably connected to the
base and positioned under the seating surface; and
wherein the object holder is adapted to be partially retracted under the seating
surface in a storage position.

28. (Original) The child seat of claim 27, wherein the object holder is configured so that when the object holder is retracted under the seating surface a portion of the object holder remains accessible, thereby providing a gripping surface.

29. (Original) The child seat of claim 27, wherein the object holder is pivotally attached to the base.

30. (Original) The child seat of claim 27, wherein the base includes a post positioned in a slot in the object holder.

59. (New) A child seat comprising:
a seating surface on a base; and
an object holder movably attached to the base to move between an extended, in-use position and a retracted, storage position;
wherein when the object holder is in the retracted, storage position, a first portion of the object holder extends beyond the outer surface of the base, and a second portion of the object holder does not extend beyond the outer surface of the base.

60. (New) The child seat of claim 59, wherein the object holder is pivotally attached to the base.

61. (New) The child seat of claim 59, wherein the object holder includes an extension slidably connected to the base and positioned under the seating surface.

62. (New) The child seat of claim 61, wherein the extension includes a slot, and the base includes a post positioned in the slot to limit a sliding motion of the object holder.

63. (New) The child seat of claim 59 further comprising a second object holder attached to the base.
